

SPEECH & DISCUSSION

Lee Rainie,
Director, Internet and Technology, Pew Research Center

TOPIC

Home/Work - The Implications of the Internet of Things and Automation for Our Daily Lives

Please join us for a presentation from and discussion with Lee Rainie, Director of Internet and Technology Research at the Pew Research Center, who will discuss his work on public expectations, concerns and fears related to emerging technological developments that are likely to profoundly affect the ways in which humans live and work.

The Pew Research Center is a Washington, DC-based „fact tank“ that conducts public-opinion polling, demographic research and other data-driven social-science research. It is non-partisan and non-advocacy. The Center does not make policy recommendations or take policy positions.
