

New ideas for the mobility of the future

#mobiltcamp – the mobility and technology barcamp – will once again gather decision-makers, thinkers and visionaries. Under the motto **rethink mobility** we want to conduct an open and solution-oriented dialogue about the different aspects of mobility.

In 15 interactive workshops, we will cover different aspects of mobility and discuss current trends in transport, infrastructure and technology.

Your topics will determine the programme. Each participant can suggest and hold their own session, addressing questions such as:

- What does my smart car know about me and who owns the data?
- How do drones change our purchasing habits?
- Artificial Intelligence on the streets - When will we see automated driving in buses, metros and trucks?

Our impulse speaker:

Michael Plagge, Business Development Director, Alibaba Cloud Germany

Dr. Gerhard Schulz, State Secretary Federal Ministry of Transport and Digital Infrastructure (BMVI)

Dr. Kurt-Christian Scheel, CEO German Association of the Automotive Industry (VDA)

Our unconventional, interactive conference works without any frontal presentations or sales talks. We encourage a cross-sector exchange on equal footing.

Be a part of it!

28 June 2018
Quadriga Forum, Berlin
